SATURDAY. MAY 20. 1883.

EDITORIAL NOTES.

The century has been correctly termed the corrupt age and if we may judge from every day results and happenings it has not been improperly named.

Centennial Celebrations like Golden Wed-dings are all the rage. And the Newbrans-wickers who by the way are known all over as a nise sociable people celebrated. The landing of the loyalists in St. John the capital on the 18th of May 1783, just one hundred years

Steward and dispenser ourse Mrs. Miller and its excellent chief nurse Mrs. Miller and her kind female assistants and last but in no sense least, its well wishing lady friends of the Woman Aid Societies and other noble adies of Winnepeg who have insured their

it is that in the great majority of instances good and honorable as well as really competent spin and instructives of the people better to serve them in city coincils or legislatives so long as the seemp and grabber and the designing are preferred to the upright, the useful and patriotic. In these days desgenerated the cause of the patriot and the upright is ridicaled as visionary, foolish and unprofitable.

One thing is however units conclusive and

BITS OF INFORMATION.

THE payment of postage originated in France in 1653.

The Pacific ocean was discovered by Balbon, Sept. 5, 1513.

The British Museum was first opened Jan. 15, 1759.

Gas-lights were first used in New York city in 1823.

CHRISTIANITY was adopted as the region of Rome 311 A. D.

From December, 1788, until March, 1789, the Delaware and Ohio rivers were both frozen and navigation suspended. In 1790 snow fell two feet deep in Ohio, and the river was so firmly frozen that mounted troops and artillery wagons rode across by the hundred.

CATS are called "unest" by a second of the control of the contr

mounted troops and artillery wagons rode across by the hundred.

CATS are called "pussy" by some people, but why they call them "pussy" instead of by their particular name is instimately and closely connected with the question why rod apples grow on greenleafed trees. The word "pursy" is the Tamil word for cat, and has been introduced into the language through folk-lore. Nearly all fairy stories about cats come to us through the Persian, which preserves the Tamil word.

The first Mayor of New York was Thomas Willet, who was born in Eagland in 1611. He came to Massachusetts when 18 years old, and in 1647 succeeded Miles Standish in the military command of Plymouth colony. When the English took New York from the Hollanders, in 1664, Capt Willet was chosen Mayor of the city and administered the Government for two years, at the expiration of which he returned to New Eagland, where he died.

Prus IX, was the 2834 Pope. Of the

New England, where he died.

Prus IX., was the 293d Pope. Of the whole number fifteen were French, thirteen Greeks, eight Syrians, six Germans, fire Spaniards, two from Africa, two from Espaniards, two from Dalmatia. England, Portugal, Holland, Sweden and Crete gave one Pope each: Italy 194. All Popes since 1523 have been elected from the Italian Cardinals. Of the 263 Popes eight died within a menth after their accession to the Pontifical throne, forty have lived only one year on the throne, twenty-two between two and five years, fifty-four between two and five years, fifty-four between two and five years, fifty-four for fifteen to try years, fifty-our from five

LESSONS IN NATURE.

Sons of the Prince of Wales Have Been Taught. From the London Telegraph... over could the youth of Princes e profitably spent than in travel-into the world and viewing the ders and beauties which clothe its There is no other way of culrating the spirit of cosmopolitanism aves, is a larger social revelation than contained in many books. There is ords can equal, as a sketch of a scene, ords can equal, as a sketch of a scene, as description which that same scene same, a bee alighting on one of the irids in my hand." me range of education the Princes or regional by their voyage around formed by the bee in making flowers cannot be realized. They response the performance of life on the gustiers and convey it on its body directly into the overy which it pierces. He thus upsets a well-known popular and convey it is about vanity or traction arrows it which vanity or traction arrows it is about a state arrows it is about a state of the convey it is a state of the "There is one popular delusion about bees, and that is that a 'bee-line' is a straight one. Let the following observation be carth. The play mountains of the earth. The play ing of the tempest; they curved lines,

is good for a stimulast site one temporal to one temporal to the great power, and feat appeal as regarded. How far also water once a week. Pat a few a basin of water, wash your as in it, and see what it good by catarriad cald, and besets. Inhale for cold, and it clear bary in sellings.

ABOUT BEES.

How They Light on Flowers and I They Do Not Fly in Straight Lines

C. E. Riddler, of Canton, Mass. writes to the Journal of Education some highly interesting facts about the bee, obtained by long and patient per-sonal observation. Following are extracts from his letter: "Bees, large and small, never alight on the top of the iris, but always in the same place, between one of the winged styles and one of the great careers or exalted stations. One petals. I have watched hundreds of them. I have never seen an exception, teathers and a portional coconnut. Soon after alighting they forced the control of the co soutained in many books. There is such time writing extant, notably of that is called the picture-sine school; it no combination of all that is closest mobilious and suggestive. Iria Virginica and the Iris versicotor of the meadows, and the process is the

described the forests, islands of monatains of the earth. The play at taken many months to act; but a fall of the certain has left a moust and the accountal superstations, and the account spectators have brought and not in straight ones. In the woods and not in straight ones. In the woods and not in straight ones. In the woods and fields their course is just the same. Sitting or reclining on a lavorite knoll, where bees are continually flying about, the same of the lange of the lan where bees are continually hying about, it is partite toy in comparison. It have seen them, day after day, at the rate of six or eight every minute, make a number of circles, large and small, around my head, and then fly off with a moon shining down upon the surface, whose tileace nothing the continually along the rate of six or eight every minute, make a number of circles, large and small, around my head, and then fly off with great rapidity, not in straight lines for any considerable distance, and this, too, where there was plenty of room for them. it the rending stem of their to fly a great distance in straight lines sea, swelling up without any obstructions, but from side up water under to side, in a kind of zigzag motion or

"Again, passing along the street, there is a great buzzing in the trees near by, of It is a swarm of bees. They are directly and, and I stop and watch them; 's millions in it. They, too, fly a listance within sight, not in straight but in eurves-majestie eurves them fly swiftly from one side arm to the other, but always in Periops they are the 'mounted and this may explain their to motion, but it does not ex-

window, and is off.
"From these observations, a bee-line is not a mathematicary amight one, any more than Court street, or some of the older streets of Boston, as they priginally existed, were straight; any is not a mathematicany i raigh any more than Court gireet, or so as quite full, when a man it to know his particular in very hungry. The waiter recomer there was no recently significent and reading any a brilliant idea struck and reading any a brilliant idea struck protection of the stone which the small protection and reading any a brilliant idea struck protection of the stone which the small protection of the
